KESSLER 
PREMIUM SKI AND SNOWBOARDS

 SWISS MADE

«The best equipment is not a luxury,
it's a necessity. Because
only the best results count.»

H Kessler

Hansjürg Kessler

PHILOSOPHY

«**High performance-easy handling**» is guaranteed in the premium products from Kessler-Swiss. Behind our meaningful mission statement lies more than simply an intention. Instead, it defines the philosophy of the world of Kessler.

Every ski and snowboard is designed and produced with passion and know-how in Schwanden in the Canton of Glarus. «High performance-easy handling» are not empty words. Our goal is to provide Swiss-made skis and snowboards that have the highest performance and easy handling to every rider and for every riding level.

MANUFACTURE

Every ski and snowboard is designed, developed and produced in Schwanden in the Canton of Glarus. Precise handiwork and a love for detail guarantee that our products are of the highest quality possible.

From the first blueprints to the well-engineered end products, our skis and snowboards go through elaborate development and production processes. Swiss craftsmanship paired with

modern technology ensure that our products meet the highest quality and performance standards.

The results are perfectly handcrafted products - Made in Switzerland.

«With a great love for detail,
we produce quality Swiss-made skis and
snowboards of the highest value.»

«Modern production technology, as well as nearby test routes, form the backbone of our well-engineered and high-quality products.»

PRODUCTION SITE IN SWITZERLAND

By manufacturing our products exclusively in Switzerland, we deliberately set up a countertrend in the ski industry. This has significant advantages in many respects. Thanks to the local infrastructure, new ideas and feedback from nearby test routes can directly influence our products. By controlling every production process, we can ensure that innovative developments are integrated into our products to ensure their high quality and performance.

TECHNOLOGY

TIMELESS DESIGN

We demand the highest quality from our raw materials and handle them with passion and precision. Beneath the timeless and spatially optimized surface of our products are only premium materials.

The exquisite wood at the core is still the best recipe against unwanted vibration and for high performance. Depending on the area of application, the selected sidewall materials ensure maximum ice grip. Every component of Kessler products deserves the «Premium» seal according to our credo: «Pure Exterior, Maximum Power Interior.»

PURE EXTERNAL AESTHETICS...

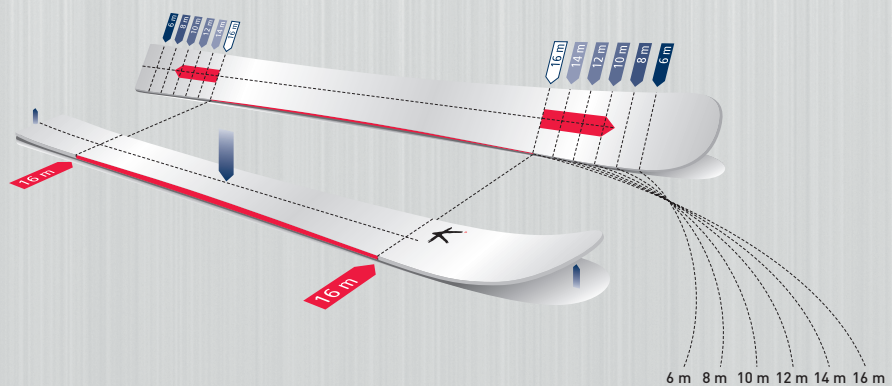

...MAXIMIZED INTERNAL PERFORMANCE

PATENTED TECHNOLOGY

KST (Klothoid Shape Technology) is the patented technology used in all of our products. This type of construction was originally developed for snowboard racing and was successfully adopted for the manufacture of skis. With KST, different radii, which are achieved depending on the angle of the skis, define the driving line. As a result, the ski is more versatile. Small, tight curves, as well as wide curves, are possible with the same ski.

The original construction has been constantly perfected during the last 20 years thanks to the close collaboration with Olympians and world champions. This experience can be felt in every product and is revealed through the high performance and easy handling of every one of our skis and snowboards.

Patent CH697123

«The secret of KST is the dynamic interplay between the baseline and the sidecut.»

SKI

PERFORMANCE, QUALITY AND
SWISS CRAFTSMANSHIP

ALPINE RACE

THE PYTHON

The performance of a World Cup ski paired with the unique Kessler Shape Technology make the PYTHON the sportiest Kessler ski that has ever existed. Ambitious skiers will appreciate the benefits of the new construction method, which, together with the increased amount of built-in Titanal, ensures that the ski has more torsional stiffness, provides a better grip on ice, and is nevertheless lighter. The optimized stiffness distribution of the PYTHON ensures an impressive riding experience when making short turns on steep slopes and for long carving turns as well.

FEATURES

- patented Kessler Shape Technology
- Clothoid Sidecut
- Sandwich Titanal Construction
- optimized K.Tec F woodcore
- Phenol Sidewalls
- sintered Base
- scratch-resistant K.Tec F flamed Topsheet

THE PHANTOM

Is compromise not your thing? Will only the best equipment do? Then you want THE PHANTOM! It provides easy handling and superior racing capability along with unprecedented grip on the edges. This is combined with ultimate stability and extreme comfort, whether going at top speed or simply in cruise mode. THE PHANTOM provides uncompromised performance.

ALPINE RACE

THE PHANTOM S

The side cut and reduced upward bend allows motions to be fluid and direct and the reaction time of the PHANTOM-S has also been reduced. Turns can be taken even faster and with more precision. Its patented Kessler Shape Technology (KST) also ensures the ease of use and maximum control. Thanks to variable radii, the performance secrets of Kessler-Swiss, one experiences the new driving experience of the PHANTOM-S at the highest level.

THE PANDORA

Women's liberation in skiing: THE PANDORA, the first high-performance women's ski. Thanks to a rigorous application of Kessler Shape Technology (KST), this ingenious lightweight solution combines snow riders' needs with feminine geometry. The result: a ski that packs a powerful punch with breathtaking skiing style. Girlie skis and flower designs? No way!

THE PANDORA S

Do you think only men have the right to power? Then why would we have developed THE PANDORA-S? With THE PANDORA-S, we provide you with the ultimate carving device, with the same features that also characterize THE PHANTOM and THE PHANTOM-S. The variable radii provided by Kessler Shape Technology ensures optimum driving performance, easy handling and high performance. All with a simply beautiful, discreet look for the most ambitious sportswomen.

BOARDS

PERFORMANCE, QUALITY AND
SWISS CRAFTSMANSHIP

BOARDER X

X-CARVE

X-CARVE, the new board from Kessler's range of snowboards, provides for even faster and more precise carving. The proven construction of Kessler snowboards with multiple titanium layers ensures that the board rides smoothly and has torsional stiffness. A progressively decreasing sidecut in the tail area paired with the modern design at the front raises the carving experience to a new level. The board's width and 6x2 inserts give you increased flexibility to achieve your optimal binding setting.

FEATURES

SPECTRA

Are you ready for freshly snow-covered powdered slopes or hard pistes? With the new SPETRA, come what may. The board's uncompromising power ensures a breathtaking performance for every snow condition. The slightly softer core provides for a more playful nature, without losing edge grip or torsional strength.

The additional use of carbon layers provides plenty of pop and an extremely fast response time of the board.

No matter what comes your way, you're ready with the new SPECTRA.

ROCKET CROSS

The K. Plate Rocket Cross has been designed to meet the highest demands of Boarder-Cross-Riders. Due to the increased elevation, the board can now get even more edge without the boot or binding touching the snow. The sleek form of the binding plate guarantees an equal application of pressure on the board whilst increasing the grip of the edges and improving riding stability.

The K. Plate Rocket Cross can be customised to the width of the board, and can be easily mounted on your own.

Length: 310 mm
Weight incl. screws: 1200 g
Adjustable width: 230, 242, 252 mm

Art.-No.	KS91.031
